

Hotel Reservation System for our Client

TalentPace helped customer by developing a compelling and Powerful online booking system boosting their revenues like never before.

Customer Profile

Our Customer is one of the leading worldwide hotels accommodations provides offering online booking services from across the globe. Provides travellers a wide range of accommodations including independent and major chain of hotels as well as self-catering in over hundreds of thousands properties worldwide and offers a one-stop shop solutions with room pricing, hotel amenities and availability.

Business Scenario

- Our customer needed to revamp their existing reservation system with state of art and contemporary features.
- Enabling them to integrate with large travel agencies, global distribution systems and thousands of other hotel properties.
- The new system should help optimizing the data services and call center operations in creating, updating, and maintaining information in its central reservation system.
- The new system has to be built carefully addressing the challenges of large seasonal spikes and high attrition rates causing inaccurate online transactions and delays, threatening business risk and costs.

Solution Delivered

- TalentPace team assessed the client's operations and architected a comprehensive solution with flexibility, scalability and offered intrinsic capabilities to integrate with third party applications.
- We have successfully countered the challenges with the established delivery model, methodologies and end to end application development lifecycle as per the CMMI framework.
- Provided robust, scalable and secured architecture and developed the entire system in a quick turnaround time.
- Keeping in mind all the critical factors and major concern of the client, we have provided cost effective solution in short turnaround time with a well-qualified and very proficient team of technical professionals to develop the complete reservation system.

Business Benefits

- Our solution helped our client reducing total operating costs by 40% whilst improving the number of transactions completed on time by 10% more than earlier.
- Ability to flexibly manage seasonal fluctuations in data volumes.
- Lower operational costs at Greater productivity.
- Higher data and process quality

Technologies

- Java
- Spring Framework
- My Eclipse
- WebLogic
- MySQL
- HTML5/CSS3

Fantastic turnaround. TalentPace committed efforts are highly appreciated by us. They quickly got the requirements and developed complete reservation system allowed us to take our multiple range of hotels products within a short time. We wish them a great success as an IT services partner.
